Cable Plug Identification /线缆插头识别

The HP3 headphones support two types of connectors. Insert the gold-plated threaded 3.5mm/6.35mm plug into the audio source. If you encounter intermittent audio or popping sounds, check if the cable is properly connected.

Connecting the Headphones to Your Device/将耳机连接到您的设备

The included cable comes with a standard 3.5mm plug. It also includes a 3.5mm to 6.35mm adapter, which securely screws into the cable end via the gold-plated threads for connecting to professional audio equipment such as mixers and audio interfaces.

随附的线缆配有标准的 3.5 mm 插头，还包括一个 6.35mm 转 3.5 mm 适配器，可通过镀金螺纹牢固地旋入线缆末端，用于连接专业音频设备，例如调音台和音频接口。

Note: The BOYA HP3 is a low-impedance, high-sensitivity headphone, meaning it is compatible with nearly all devices. However, this also means that excessive signals may be generated even when the amplifier volume is set low. Therefore, before plugging in the headphones, set the amplifier volume to zero and then gradually adjust it to the desired level.

提示：BOYA HP3 是一款低阻抗、高灵敏度的耳机，这意味着它几乎可以与任何设备搭配使用。但也正因如此，即使放大器的音量设置很低，也可能产生过大的信号——因此，在插入耳机之前，请将放大器的音量调至零，然后逐渐将音量调至所需的水平。

Maintenance & Care/保养与维护

Gently wipe the headphones with a soft cloth dampened with a small amount of water and neutral detergent. Do not use solvent-based cleaners, as they may damage the headphone components.

请使用沾有少许水和中性洗涤剂的软布轻轻擦拭耳机。切勿使用具有溶解作用的清洁剂，否则可能会损坏耳机部件。
