Thanks for purchasing BOYA!

The BY-M3-OA is an omnidirectional microphone, specially designed for the DJI OSMO ACTION. It delivers an improved sound compared with the internal microphone.

It features plug-and-play operation and has a wide frequency response of 50 Hz to 20 kHz. It's very lightweight and compact, so you can effortlessly take it to anywhere.

Furthermore, the 2m (6.6') cable terminates with a Type-C output, but it doesn't support either Type-C devices or other DJI series.

With the foam windscreen and fur windshield, the microphone greatly fights against the wind noise and unwanted vocal plosive in outdoor activities.

Note: The unit can only be used with Osmo Action, not with DJI Action 2 or Osmo Action 3.
